Domestic Growth

It cannot be too clearly realized

that the tremendous help which

the British nations overseas have

afforded the Allied cause in the late war,

so far from making for the central

ation of Imperial policy, has given to

the separate members of the British

Commonwealth such a title as has

never before had to decide their

own destinies. That title is suitably

recognized in their individual

signatures to the Peace Treaty and in

their representation on the assembly of

the League of Nations. — Manchester

Guardian.

What One Farmer Did For Decreasing Armaments

How A Kansas Farmer Solved The

Labor Problem

A farmer in Kansas, J. S. Brown,

of Mulvane, faced with the impos-

sibility of obtaining hired help, decided

to solve the problem in another way.

He advertised that his farm produced

more than \$4,000 last year, that

it was only three miles out of town,

and that he would rent it on a "fifty-

fifty" basis, he furnished the farm and

equipment and the tenant and his wife

to do the work. The result, we are

told, was astonishing. Before his next

morning chores were done, he was

called to the telephone by long dis-

tance. The first applicant in person

appeared before breakfast was over.

From that time on prospective ten-

ants came in "flocks and droves," on

every train, and in every sort of ve-

hicle, wanting to know more of his

proposition. Every walk of life was

represented, many willing to leave

good jobs in the city to take a chance

on the farm.

Conductors on the trains from

Wichita reported a record Sunday

business to Mulvane. Long distance

calls from Wichita were handled in

relays of seven. Mulvane was full of

autos all day. The long distance

telephone calls totalled more than 100,

many applications were uncounted,

and more than 250 letters in the mail

were returned as disappointed. "One

thing shown by the incident is the

unrest of the people," comments our

correspondent. "There is a lot of

folks who evidently hanker after the

agricultural life, and the reason that

the farmer is having so much trouble

in getting help is that he is not putting

it up to the people in the right way.

If the farmer will arrange to take his

helpers in on some partnership basis

rather than as a mere hired man, it

will be possible to get plenty of help,

beyond a doubt."

Europe Needs All The Produce Can-

ada Can Create

"If the international position is

rightly handled and adjusted, the fu-

ture of Canada will be come a bright

one," said Sir George Paish, famous

British economist, recently. "Europe

needs, and will continue to need, all

the produce Canada can create. The

agricultural life, and the reason that

the farmer is having so much trouble

in getting help is that he is not putting

it up to the people in the right way.

If the farmer will arrange to take his

helpers in on some partnership basis

rather than as a mere hired man, it

will be possible to get plenty of help,

beyond a doubt."

The creameries officials stated that

the company was not making a prac-

tice of shipping butter out of the

province, except the surplus produc-

tion. From time to time, however,

they were entering other markets to

get an idea how the Saskatchewan

product compares with the best of

other lands, and in every case the

company has learned that Saskatche-

wan butter stands at the top.

It is the intention of the officials to

redouble their efforts to get Saskatche-

wan farmers to produce more milk

and cream, for they averred that they

could display a carload of butter

every day on the Chicago market if

this was available. In fact, it was

stated, there is no limit to the quan-

tity which could be sold outside the

province.

Minard's Liniment for sale every-

where.

Anent Opportunities

How Young Men Have Risen to High

Positions From Low

Estates

There are people who keep saying

until they believe it themselves that

the time has passed when a young

fellow can begin at the bottom of a

big corporation and work to the top,

but it is still true that a very large

majority of highly paid executives

have risen from the ranks. Of a

number of men taken from random at

a list of railway officials who are re-

ceiving salaries of fifty thousand dol-

lars or more a year, one entered the

service of the railway as a mechanic,

another as trainmaster's clerk, another

as a fireman, and another as a ware-

houseman and brakeman. Most of them,

however, began railroading while they

were still in their teens. As many

opportunities as ever before are wait-

ing today for the men who can

recognize and grasp them. — The

Youth's Companion.

Big Land Deal in Saskatchewan

A sale of farm land amounting to

a quarter of a million dollars was

effected by Charles Appleby, a real

estate agent in Minneapolis, Minn.,

representing a number of Iowa

men. The land is in Saskatchewan in

the Humboldt district, one of the best

mining districts in Western

Canada.

Charming a Right

What sort of a woman is she?

"Charming," I was with her for two

hours the other day, and in all that

time she never once mentioned the

high cost of living or the flu."

A new broom sweeps almost as

clean as a straight flush.

Indians Seeking Rights

Indians of East and West Decide To

Stand by One Another

An informal meeting was recently

held in Ottawa of representatives of

the various influential bodies of In-

dians in Canada. The delegates were

representative of the Council of the

Six Nations of Brantford and of the

White tribes of British Columbia.

While no resolutions were passed it

was decided to stand by one another

in the interests of their rights and

privileges, whilst a proposal to estab-

lish a general Canadian Indian al-

liance was favorably received.

The principal subjects discussed

were (1) the pending bill before par-

liament proposing compulsory enfran-

chisement of Indians; (2) The wrongs

of the British Columbia Indians, arising

from the complete denial of that

province of any land rights or other

tribal rights whatsoever to them. The

bill is now before the House of Com-

mons, by which it is proposed to

carry into effect the agreement re-

garding reserves entered into between

the two governments in the year 1912,

which was based upon the assumption

that the Indian tribes of British Col-

umbia have no land rights; (3) The

interesting historical claim of the Six

Nations of the government of their

own internal affairs. The conference

is to be continued and is expected to

be of benefit to all Indians in Canada.

Demand for Good Horses

Sires At This Season Are A Commu-

nity Need

You should co-operate with your

neighbors in order that some good

sires may be brought in by private

parties, or leased before the breeding

season opens. Because:

1. The demand and price for good

horses and mules is increasing in

cities.

2. Farm demand is improving.

3. There is a shortage of good horses

and mules of all kinds.

City trade is improving, because

of the increasing use of automobiles

discovered after years of experience

that horses furnish the cheapest of

all sources of power on short hauls.

On this Harry Vickers, president of

the Fuel Cartage Company of Chic-

ago, says: "There is work today that the horse

cannot do—long distance hauling with

rapid transportation—but the motor

can never take the place of the horse,

because the horse can do the work in

short hauls just as rapidly as the

lessened cost of 25 to 40 cents on the

dollar, consequently we never allow

a truck to displace a team. We will

buy a truck to do the work that a

horse cannot do, but we don't send

a truck to do the work that a horse

can do. It would be like having a

dollar and throwing away 40 cents."

Of the farm demand, W. S. Cora

says: "Farmers are determined bid-

ders in country sales and prices for

good horses have gone \$35 a head in

the last thirty days, while mules are

bringing from \$800 to \$1,000 a pair."

Of the shortage, W. Y. McCreary,

Minneapolis, says: "What we want

contractors want is good horses. We

don't want scrubby light of weight,

incapable of hard work, and selling

cheap. We want horses that will

weigh 1,700 pounds or more and we

are willing to pay for them. A team-

ing contractor in this city paid \$800

for a pair of five-year-olds yesterday

that weighed 3,200 pounds. The big

trouble is that the farmer expects us

to pay high prices for a green horse,

one that is liable to distemper and

is not properly broken. The buyer of

such a horse is taking a big chance

that he'll die or be laid up and, con-

sequently, won't pay as much for him.

Give us good, sound, big horses with

a little experience behind them. We

can get enough of them and the de-

mand will never run out."

Claims of truck and tractor manu-

facturers that horses and mules are

destined soon to disappear are very

properly met with the query: "Why

should the government, which is ac-

cording to your views, be obsolete

and destined to speedy disappearance,

be in greater demand and at higher

prices than ever?"

The best thing a farmer can do this

Local News Notes

The last dance of the Lacombe Assembly Club will be held in the Assembly hall on Friday evening, April 26. The series has been most successful and enjoyable, and those in charge are to be congratulated upon the excellent management.

Baseball meeting tonight, be there. 61 Floor Varnish in the clear and in eight different colors. At Morrison and Johnston Ltd.

Next Sunday there will be a special service in Milton School at 8 o'clock, when a collection will be taken for the Armenian Relief Fund. A generous response is requested, as the cause is most worthy. Rev. Stewart will officiate.

The Ladies Guild of the Presbyterian church are holding a "Birthday Party" on Wednesday evening, May 8th at eight o'clock in the basement of the church. Come and enjoy refreshments and music.

The Auction Sale held at the Dagg Barn last Saturday was another successful sale from every point of view. This is the second sale held there, and both were a decided success. J. R. Whitney the Auctioneer is opening an Auction Mart in the town of Lacombe and will hold a sale once a month.

Sherrin Williams Flat Tote ready for use for the Artistic decoration of interior walls, ceilings and woodwork, in durable flat effects. Morrison and Johnston, Ltd.

I will hold a sale at Dagg's Barn Lacombe on Saturday April 24. All parties having stuff to sell "without reserve" should list it at my office as soon as possible as the bills will be out by Saturday this week. I expect to hold a monthly sale and semi-monthly sale, if conditions necessitate it. J. R. Whitney, Auctioneer.

There will be a meeting of the baseball club tonight in McConnachie's garage.

Japalac, a durable varnish, stain, that wears like iron, sold in all sizes from 1-4 pint up. Morrison and Johnston, Ltd.

The snow is going fast, and the farmers expect to be on the land about May 1st.

The feed situation in the Province is serious. Up to date some three hundred carloads of feed have been shipped from Lacombe to less favored parts of Alberta.

Miss Archibald of Calgary, assisted by local talent will be the U. F. A. attractive at Lacombe School House on Monday Evening April 15th. Everyone invited. Come and bring a friend. Refreshments.

Wallpaper. We will supply paper for walls, ceiling and border for room 12 x 14 for \$4.05. Lacombe Furniture Store.

Baseball meeting tonight, be there.

Paint your buildings and save the paint. See us for what you want Morrison and Johnston, Ltd.

Alex Galbraith has advised Secretary Welch that the government is still in a position to assist the Agricultural Society in putting on a Flowering match this season. The Society will, however, go ahead and arrange the match and furnish the prize money.

Wallpaper, Murex, Floor Paint and Varnish for spring cleaning at Lacombe Furniture Store.

Listings wanted on 27 houses of all sizes in the town of Lacombe. Lacombe Realty Co., or Bunnett Bros.

Hides and Furs bought, spring rates \$4.00 this week. Lacombe Furniture Store.

Don't forget the baseball meeting tonight at McConnachie's garage. Everybody come. Business of importance to be transacted.

Furniture. New spring stock constantly arriving, prices right: At Lacombe Furniture Store.

Dr. Simmonds, dentist, has returned from a visit to Vancouver.

The Dental Clinic at Red Deer having been closed Capt. and Mrs. Shute and family are spending a few days in Lacombe, before going to the coast where they will reside in future.

Miss Jean Cannon, who has just graduated from the Vancouver General Hospital, arrived home on Sunday for a visit at the home of her parents Mr. and Mrs. A. C. Cannon.

The Adventists will in the near future commence the erection of another building on their property on Barnett Lake. The building will be the same size as the first building erected, and will supply greatly needed accommodation. The Canadian Junior College has a very large enrollment this year.

Mike Madden declares he is not a "profiteer" and we agree with him. We are of the opinion that a person is entitled to the highest price he can get for any commodity.

Jack Halpin returned on Sunday after spending a few days in Calgary.

"The Lord's Prayer"—a lesson on

Prohibition, will be the subject next Sunday morning at St. Andrew's Church. In the evening the first of a series of sermons on the drama of Passion, entitled "Jesus or The Man Who Sold the Christ," will be given. Choral music at both services.

"Does It Pay?"—A frank discussion of the Prohibition situation, Alberta and the Dominion, generally faces a great chance, what ought we to do? At Grace Church on Sunday evening, 7:30. Sunday school at 11 a.m. Lakeside—"They have no Wine." The challenge of Christ against the false stimulus. Service at 3 p.m. All welcome.

Sunday April 14th. English Church Service at 11 a.m. and 7:30 p.m. Sunday school at 12 noon. Service at Blackfalds 3 p.m.

The Lacombe Elevator will close for the season on May 1st. Farmers are requested to bring in their participation certificates at once and have them exchanged. It is important that this be attended to at once.

Two weddings took place this week, that of Mr. McIntosh and Miss Jean Hill, in Calgary, and Mr. Sim Kamm-giesser and Mrs. Lang, in Lacombe.

The Chiropactors Again. (Taken from the Canada Lancet) Ontario.—In the early days of February, a deputation of this cult waited upon the present government with the view of presenting the case of chiropaxy, and securing some sort of legal recognition.

One of the stock arguments used was that the medical profession was opposing their claims through a desire of having a monopoly of the right to attend sick people. This is entirely false. The medical profession is on record many times over to the effect that all it wishes is the same standard for all. After securing the license of the medical council, then one may practice under any name he pleases, or by any method he chooses, however foolish they may be. This is just what the Chiropactors do not wish. On the contrary they are seeking a short cut to a means of making money by a fake system of treatment.

Chiropaxy is an uneducated humbug. It has not the least foundation in science to rest upon. The theory of some sort of spinal displacement pressing on some nerve as the cause for all sorts of disease is absolutely incorrect and is well enough to suit the frenzied brain of a fool.

The deputation took occasion to condemn Justice Hodgins' report. It would be expected to do so. In the report the system of chiropaxy is placed where it properly belongs, namely, among the things which should be given no countenance or status; practice its methods upon suffering humanity.

Then the deputation asked that until an act be passed, chiropaxy be given such standing as an order of council could grant them. How beautiful. By this means the hope is to secure some claim to vested rights which they have not at present. As a cancer is to the body, so is chiropaxy to the healing art.

Feed Situation is Affected By Warm Weather

Edmonton, April 13.—While there is still a great amount of hay in the country, the warm weather of the past two days has considerably altered the situation in the province. Deputy minister, H. A. Craig of the department of agriculture, stated Monday morning that this was particularly noticeable, since that particular morning he had had no request for hay and had had offers to sell in considerable amounts. Two of these offers included lots of 500 cars, but were offered at high prices. The hay being brought in by the department is being landed at between \$4.00 and \$4.50 a ton.

Mr. Craig stated that hay and feed are coming to all parts of Northern Alberta in fairly large quantities. A considerable amount of sheaves which have been in stock and under the snow have been bought up by farmers who have dug them out and have loaded them. A large quantity of straw has been moved by the G. T. P. lines south of Camrose.

The department has been receiving shipments of feed on all lines states Mr. Craig, especially on the C.N.R., the G.T.P. and C.P.R. lines running east. These cars are being allotted to the various towns where feed is short and farmers are getting their share out of each car as far as it will go.

Three hundred and forty cars of timothy are now being to points throughout central and Northern Alberta, thirty of these will arrive in Edmonton this week, and three cars were already on track at Strathcona Monday morning. The department has still about a thousand cars of hay to be delivered. This will be allotted to various towns throughout the whole province where feed is short. It is hoped, says Mr. Craig, that a considerable amount of this hay will be stored for feeding horses through the spring work.

The conditions in the country cannot change very rapidly on account of the depth of the snow, he believes, but as the warm days approach, the trying time on breeding stock will come.

There is practically no hay in B.C. but they have bought some in the U.S. and it is a little difficult for them to know just how much more to get he states.

Whether more hay will be bought from the States or not depends, states the deputy minister, on the demand on the department during the next few days.

Agriculture

It is imperative that every agriculturist join a second association with a progressive banking institution. This bank is stimulating production by providing a loaned service for ambitious farmers. Any of our 400 branches can furnish reliable information as to markets and shipping facilities.

Resources exceed \$174,000,000.

You have the raise if you buy your car now. W. E. Tees.

Other Late Springs

Most people are now saying that never was such a spring before in all their memory and yet it is only a few years since a spring occurred so late that the papers were full of accounts of a year some century or so ago when summer failed to come and no harvest was reaped all over most of the northern hemisphere. That was the spring of 1907—only 13 years ago. There was ice in most of the lakes at the end of May that year and little sowing was done before May 24; much of it later still. And a very good crop was reaped at that. Going farther back, there was heavy snow on the ground, April 1 in 1890. It had been warmer, but one of the heaviest blizzards of the year piled some two or three feet of snow all over the prairie on the last few days of March, and the first few days of April were real winter. Again in 1892, after much seeding had been done, there came real winter weather, and sleighs were used during the first few days of May, while the weather was quite as cold as in the first few days of April this year; some of the grain that the snow did not cover was killed in the ground and did not sprout again, but the crop on the whole was fairly good.

Automobiles—another raise coming. Buy Now. W. E. Tees.

Born Parsons—At Lacombe, Alberta, on April 8, 1920 to Mr. and Mrs. P. Parsons, a daughter.

KRAY A. MODERN

DIAGNOSES METHOD
The routine use of the X-Ray in the diagnosis of internal diseases such as cancer of the stomach, tuberculosis of the lungs, etc., has now come to be recognized as one of the most important. An interesting fact is given where 1140 drafted men of the U.S. overseas service at one point were examined for chest disease. In 24 per cent of these 1140 men the physical examination failed to reveal a disqualifying chest disease, but in each of these the X-Ray had clearly demonstrated the ailment. The X-Ray it will be seen is sufficient in itself to diagnose the presence of tuberculosis or other such disease in the human body.

Took Overdose of Morphine
Wetaskiwin, Alta. April 12.—A tragic ending came to Roy Lawson, here Saturday evening when he died as result of eating an over dose of morphine. While under the influence of liquor, Friday evening he broke into the east side drug store and after pocketing several bottles of whiskey found a bottle of morphine pills on the shelf and swallowed a big dose. He was found unconscious next morning and rushed to the S.C.R. hospital where everything possible was done to revive him, but without success. Little is known of the man, as he came here only a few days ago with farmers from the east in search of feed. He is about thirty-five years of age and is thought to be a native of South Carolina.

THE SEA MUSSEL INDUSTRY

A shell industry which has almost reached its peak of popularity is not less than the development of a quest for the most delicious and somewhat costly oyster. This is the sea mussel, found in vast quantities along the low tide margin of the Atlantic coast, chiefly in New Brunswick. The Dominion Government, with the co-operation of scientists, has conducted experiments to this end in Western University laboratories and it is now claimed that mussels can be produced commercially and sold profitably at 15 cents per quart, as compared with the \$1.00 per quart of which oyster prices have soared.

The mussel is by no means a new article of diet to the people of Canada, and besides being used extensively in coast towns has found its way to the tables of inland cities in Central Canada. Its delicacy of flavor and high food value have been much advertised since the establishment of government investigation and experiment, and deserve to be much more known. There is yet much to be done in the line of research to ascertain conditions under which production would be most rapid and profitable, and to this end the Council of Industrial and Scientific Research is devoting its efforts.

A survey of the mussel beds of the St. Croix River, which constitutes the boundary between New Brunswick and Maine, has occupied the attention of a scientist of the council. It is believed that the beds of mussels are practically unlimited, and the work occupying them—ensuring the best conditions of development. It has also been determined that mussels become rarer and more palatable the farther north they are found, and in this regard Canada has a distinct advantage over the mussel beds to the south of the Dominion. Those of the Hudson Bay make particularly attractive eating.

The sea mussel cannot be produced in fresh waters so that there is no possibility of developing an industry in the Great Lakes. It is believed that there are possibilities, however, for the development of fresh-water mussels there and the Dominion Government at the instigation of the Ontario Fishermen's Association is conducting a series of experiments which will probably result in vast developments.

The Prize Winner

The General office of the Imperial Lumber Co., Ltd., at Edmonton announce the result of a recent contest for which a prize of 10.00 was offered for the most clever and original verse containing the line, "For it pays to deal with us." Surprising results were obtained and hundreds of verses were sent in. Children of all ages, and men and women from all parts of the Province competed. After due consideration by the Judges, the prize was awarded to Mrs. H. G. Garrioch of Heath, Alberta. Following is the verse which won the prize: "If you are in need of Lumber, Phone us up, you know our number, And the terms we can discuss, For it pays to deal with us."

For Sale Baby chicks and hatching eggs from purebred winter layers. S.C. Dark Rhode Island Red. Eggs \$2.50 per setting of 15. Mrs. M. Reicher, Bentley, Alberta. M24-3p.

Lincoln News

Mr. Kirk Dix left last week with canoe and camp outfit for the far north regions, and expects to be away some time. Mr. Dix has travelled in the north country before and is of the opinion that there is a great future in the far northlands of our fair Dominion.

F. Gustafson has purchased a Seelye and has been busy setting the machine together. If the present weather continues, we are afraid it will be some time before he will be able to put this implement in operation. However there is nothing like being ready for good times.

Mr. Ferguson, Commercial Engineer has completed his trip through this district. Mr. Ferguson was here in connection with the telephone business and judging by the applications he received for telephone, everyone in the district will soon be on the wire.

We read in a Vancouver paper an article touching upon the Naval Policy of Canada and the writer of the said article thinks the majority of Canadian People are very pleased that Canada's Navy is a thing of the past and also that they hope the Naval Question will never be brought up again, there being no necessity for a navy and that the people are glad they will not come in contact with the "Stuffy Naval Officers" with their holy-holy manners. We are indeed sorry for this narrow minded individual and would like to remind those who do not know that the "Stuffy Naval Officers" and the men under them were largely responsible for the glorious finish to the late war. It is not necessary to say anything about the work of the navy. It is not necessary to say anything about the work of the navy. The way the German Fleet was handled over to one of the "Stuffy Naval Officers" speaks for itself. We do not think many Canadians more especially those who took part in the war either at Sea, in Europe or in Mesopotamia will pay much attention to the article in which we refer, as we feel sure they have at least some regard for the men about whom the party who wrote that article speaks in such contemptible manner.

Canada has no Navy at present, but we sincerely hope that push will not always be the case and should anyone feel inclined "to bite us on the leg" we will be able to manage our own officers and not have to seek aid from a foreign nation.

TURVILLE

Mr. and Mrs. Geo. Lemmon attended church at Westlone on Sunday last.

Mr. and Mrs. D. Foren were Olive callers Saturday.

Mrs. D. Foren and Mrs. G. Lemmon and Mrs. F. May attended the W. I. at Olive on Saturday April the second. School starts on Tuesday after Easter.

Mrs. Beatrice Wells and daughter Emma spent Thursday at the Lemmon home left Friday for Westlone where she will make her future home.

We are glad to see Mr. and Mrs. A. L. Whitten home again.

Mrs. G. Lemmon was a Lacombe caller between trains on Friday April 9.

Mrs. Arthur Wilson was also a Lacombe visitor on Friday.

Lacombe Needs a New Hospital

It seems too bad that Lacombe has not better Hospital Accommodation. The present building is far too small, no conveniences whatever, not up-to-date in any way, we are all aware of this fact. It has one redeeming feature about it it has never been in debt. The building has been too small to accommodate the number of patients required to run it as most people think it should be run, but the hospital board (very wisely) decided the present arrangements were best and the only way, unless to be in trouble all the time. I am not able to do hospital work, as I have in the past, and think the younger women should pluck up and do things. I mean the ladies of the whole district. Lacombe does

NERVES ALL GONE TO PIECES

"Fruit-a-lives" Conquered Nervous Prostration

R. H. No. 4, QUEEN PLAINS, MAN.

"In the year 1910, I had Nervous Prostration, in the worst form, dropping from 170 to 115 pounds. The doctors had no hope of my recovery, and every medicine I tried, proved useless until a friend induced me to take 'Fruit-a-lives'."

I began to mend almost at once, and never had such good health as I have enjoyed the past eight years. I am never without 'Fruit-a-lives' in the house." JAS. S. DELGATY, 100, a box, 8/6 for 20, trial also 25c. At all dealers or sent postpaid by Fruit-a-lives Limited, Ottawa.

not require a hospital any more than the country districts, and it should be a community hospital; but all the different societies could take hold and work up the interest among themselves and the people in general. If the ladies take hold of this, it will go alright; women should play a more prominent part in the running of hospitals, for various reasons. Perhaps the Lacombe ladies should start first; they did erect walls for the Red Cross and proved themselves great hustlers. Are they not interested in a better place for our sick ones. We have good doctors in Lacombe, and if they had a large place they might have a training class for girls, and boys too for that matter, they might be of great service at times. Nurses are rather scarce and the long term of 8 years training makes them of some importance. The present building was built with very small bits, except for a few large donations from our merchants and a few others when a fund was started about 10 years ago, not even a tag day when to help along and must say the one who created 'Tag Day' should be crowned, it has helped so many good things along and never hurts anyone, but its hard to get anybody to help sell them once a year. We don't realize half what we should. Only for the noble few who were always willing to help and not find fault with this, that and the other thing, conditions might be better even now. Mrs. Burris.

ESTRAY

Do not forget to file your

Income Tax Return on or before the 30th of April, 1920.

Dominion of Canada

Department of Finance

ALL persons residing in Canada, employed in Canada, or carrying on business in Canada, are liable to a tax on income, as follows:—

1. Every unmarried person, or widow, or widower, without dependants as defined by the Act, who during the calendar year 1919 received or earned \$1,000 or more.
2. All other individuals, who during the calendar year 1919 received or earned \$2,000 or more.
3. Every corporation and joint stock company whose profits exceeded \$2,000 during the fiscal year ended in 1919.

Forms to be used in filing returns on or before the 30th of April, 1920.

ALL INDIVIDUALS other than farmers and ranchers must use Form T. 1.

FARMERS and RANCHERS must use Form T. 1A.

CORPORATIONS and joint stock companies must use Form T. 2.

Penalty

Every person required to make a return, who fails to do so within the time limit, shall be subject to a penalty of Twenty-five per centum of the amount of the tax payable.

Any person, whether taxable or otherwise, who fails to make a return or provide information duly required according to the provision of the Act, shall be liable on summary conviction to a penalty of \$100 for each day during which the default continues. Also any person making a false statement in any return or in any information required by the Minister, shall be liable, on summary conviction, to a penalty not exceeding \$10,000, or to six months imprisonment or to both fine and imprisonment.

General Instructions.

Obtain Forms from the Inspectors or Assistant Inspectors of Taxation or from Postmasters.

Read carefully all instructions on Form before filling it in.

Prepay postage on letters and documents forwarded by mail to Inspectors of Taxation.

Make your returns promptly and avoid penalties.

Address INSPECTOR OF TAXATION, CALGARY, ALTA.

R. W. BREADNER, Commissioner of Taxation.

Barrier of Blood Theme of Drama Seaside Hayakawa, one of the real masters of screen characterization is seen to admirable advantage in his latest photo drama. "The Man Beneath." At the Rex on Friday and Saturday next.

The production was made by Hawthorn Pictures Corporation under the direction of William Worthington, and is distributed by Exhibitors Mutual.

Dr. Chindi Ashutara (Hayakawa) was a high caste Hindu with centuries of Oriental thought behind him. Kate Erskine (Helen Jerome Eddy) a bonnie Scotch lass with generations of Hardy ancestors as her forebears. The Hindu loved Kate Erskine while the Scotch girl had to admit to herself that she reciprocated; that love recognized neither caste, creed nor race.

Around this theme revolves a story of black-hand intrigue, Oriental mysticism and exciting dramatic situations which hold the audience in suspense to the final scene.

The Japanese star does some convincing acting in his quiet, masterly way, a manner that is too rare among screen actors. The supporting cast is excellent. Helen Jerome Eddy, Pauline Curley, Wedgewood Nowell, Jack Gilbert and Fountain LaRue, being well cast in their respective roles.

For Sale

One horse tent 30 x 30, 6 ft. walls, 12 oz. roofing with centre pole, good as new. One cook kitchen 14 x 16, 6 ft. walls with ridge pole. One John Deere road plow 12 in. One pump for water tank with 12 in. hose good as new, extra nozzles. Any person wanting any of the above can apply Mountain Cyclone Kennels, Lacombe. Two miles east and four miles north of Lacombe; opposite Milton School.

Estay

One dark brown gelding rising 3 years old, star in forehead, white hind foot, branded YF with quarter circle under on left stifle. Finder notify, Chas. E. Hankins, Bentley. 17-5p.

PLowing

Contracts wanted for plowing or disking from 50 to 200 acres. For further arrangements, write, August Genet, Olive Alberta.

DO NOT MISS THIS ISSUE

Canada's and the World's Need

Occasions arise when it becomes the patriotic duty of every man, and woman, too, to forget, neglect, even sacrifice, their own work and interests for the general good of their country. Such an occasion arose with the outbreak of the Great War. The happiness and comfort of home, success in business achievement, the general betterment of one's position in life and the promotion of the family's welfare, usually and properly the chief worldly concern of any person, suddenly became matters of minor importance. The liberty of the whole human race, the basic principles on which civilization rests, the idea of independence of the nation itself, were jeopardized and their destruction threatened. In these circumstances, one's devotion to purely personal interests became utterly selfish and unworthy.

Generally speaking, a man serves his country and the cause of humanity only when he devotes his best thought and energies to the every day work which calls for attention, providing the work in which he is engaged is legitimate and worthy. It should not be, of course, a selfish absorption in his own interests to the exclusion of everything else. It should not be a merely regard for personal gain irrespective of the effect on others, and wholly neglectful of the finer things in life and of community and national interests. But, on the whole, the person who does his work faithfully and well is serving his country and fellowmen at the same time.

This, let it be repeated, is true as a general proposition, but it is not at the present time. The needs not only of Canada, but of the whole world, of the needs of that civilization which was saved from destruction on the battlefields of the world during the historic years 1914-1918, are imperative. Every Canadian to "be on the job" doing his own particular work at this time.

There is no need for emphasizing this fact because there is evidence on all sides of an inclination to "let up," to put less effort into one's work, to get through the day as quickly and easily as possible, and this at a time when, because of the wholesale destruction of goods and wealth caused by the war, there is greater need than ever before for a maximum of productive effort. As has been pointed out over and over again, not only do men insist upon easier work, shorter hours of labor, more pay and more of the good things of life, but they become indignant if the price of these goods goes up. Yet it must be apparent to all intelligent and reasonable men that if less is produced and more is consumed necessarily must result and a rise in prices becomes inevitable as the force of gravity.

This general relaxation is, however, a natural sequence of the war, and it is not confined to any one class of the population of this and other countries. It is manifest in all ranks of society. During the war there was a tremendous urging of farmers to work early and late and increase food production, and of all industrial workers to turn out a maximum of goods. The same incentive to effort was urged in connection with the Victory Loan, Patriotic Fund, Red Cross, and other drives. It found general expression in work, service, sacrifice. Everybody was living at high tension.

It is inevitable and only human nature that such a strain, for which many were ill-prepared, should be followed by a reaction, and that with the relaxed tension there should come a period of slackness, lessened production and lack of interest in work. It is the same feeling which forces a man after a period of tense application to take a holiday. The war saw an extreme of work and sacrifice; now we are having an extreme of slackness and selfishness, wherein everybody wants as much as possible

by giving or paying as little as possible.

But along this path lies individual and national loss and, if persisted in, ultimate disaster. If we all look upon the world as our enemy to be squeezed dry, at a time when a desperate struggle is in progress to rehabilitate it, then we are but hastening our own disappointment and increasing our loss. On the other hand, the man or woman who refuses to let themselves down, and who sticks to their job now will find in a comparatively short time that they have not only rendered real service to their country and to the world, but that they have enormously advanced their own interests and placed themselves in a strong position to meet and overcome any of the adversities which may yet have to be faced before this old world is again established on a normal foundation.

Tasmanians Prefer Private Shipping

Importers Especially Anxious For the Restoration of Former Service

Since the war Tasmania has been deprived of the fortnightly steamer service from London that had been carried on for nearly 40 years. The Panama Canal has had some influence in this, as the steamer after calling at Hobart went to New Zealand, and they have been adopting the shorter route in preference to the cape.

The Commonwealth Government line recently announced that its steamers would call at Hobart with cargo from the United Kingdom, but Tasmanian importers are especially anxious for the restoration of the former service, and the largest importing companies and firms at Hobart have recently signed an agreement to finance their imports to the ships that previously carried on the trade, provided they supply a satisfactory service, the penalty being 10s. a ton on cargo that may be diverted.

The companies concerned, the New Zealand Shipping Company and Shaw, Savill & Albion Company, have announced their intention of resuming the trade, and if the provisional agreement signed by the importers is completed there will be little cargo for the Commonwealth Government steamers to carry. The agreement is to be operative for two years.

The reason for preferring the ships of the private companies is that they carry passengers, about 10,000 a year passing through Hobart in pre-war times en route to New Zealand, whilst Hobart was made the trans-shipment port for the other states of the Commonwealth. In addition, the cargo is delivered in about 40 days, and Hobart being the first and only port of call in the Commonwealth the cargo is on top and turns out in excellent order. In the case of the government ships they carry cargo only, are much slower and call at other Australian ports first.

Why Eat Anything?

In London, the public, objecting to the increased cash charges, has adopted the simple expedient of not employing cabs, with the result that the spectacle is very frequently presented of cabbies appealing for fares at the prospective customer's own price. In Paris the refusal of citizens to use taxicabs for a similar reason has had the unobvious effect of rendering the drivers polite instead of insolent, as was their wont. The moral is obvious, the public can cure extortion in any direction by the very simple expedient of leaving the extortioner to his own device.—Montreal Gazette.

Transaction of National Importance

Sun Life Assurance Co. Purchase Block of United Grain Growers Twenty Year Bonds

A financial transaction of national importance, but of especial interest to the farmers and grain growers of the West, has just been completed between the United Grain Growers and the Sun Life Assurance Company of Canada, according to an announcement obtained by this newspaper from Mr. E. A. Macmillan, treasurer of the Sun Life.

The remarkable growth and the vast amount of good accomplished by the United Grain Growers in their measures of co-operation in the marketing of grain, etc., for the farming community of Western Canada are well known. The board of directors of the United Grain Growers intend to branch out on a still larger scale, and has just authorized an issue of \$2,000,000 of its new twenty year first mortgage twenty year gold bonds.

Three quarters of a million of this issue has just been purchased by the Sun Life of Canada, and the remainder of the issue when needed by the Grain Growers will be offered to the Sun Life.

This is an instance of a Canadian life company which draws its resources in the way of premiums from the public, directly assisting a co-operative enterprise of a very important section of the people.

The bonds are secured on the elevators and real estate of the Grain Growers spread over the provinces of Alberta, Saskatchewan and Manitoba, and the issue is composed of more than 30,000 shareholders who reside in these western provinces and are farmers and grain growers.

The head office of the United Grain Growers is in Winnipeg and the office here is president, Hon. T. A. Cramer; first vice-president, C. Price Jones; and vice-president, J. Kennedy; secretary, J. A. Hand; treasurer, F. M. Black. The head office of the United Grain Growers is in Winnipeg, and the head office of the Sun Life is in Montreal.

Minard's Liniment Relieves Neuralgia

The Candid Volunteer

An Australian who did clerical work for his government during the war tells how in going through a batch of enlistment forms one day and checking the usual questions as to name, age, address, occupation, and so on, he came upon one decidedly original reply. The question was "In which regiment," was answered by the assurance, "strictly sober."

It's easy to convince a woman that the photograph that flatters her is a better likeness than that which she sees reflected in the mirror.

"SYRUP OF FIGS"

CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruit taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say "California."

Will Locate in B.C.

Iron and Steel Industry On The Pacific Coast

A powerful British iron and steel company will locate in British Columbia and establish a complete plant for turning out all products of the industry, according to advice received at Vancouver, B. C., from England. Work on preliminaries connected with this firm's location for activity in western Canada has already been started. This company will be capitalized at five million pounds sterling, and will work in British Columbia with an established coal company having rail and water connections. Negotiations of British Columbia are being utilized.

Among many people sneezing is interpreted as a sign of evil fortune. By many it was once believed to be lucky from noon to midnight and unlucky from midnight to noon.

Happiness is the result of being poor and respectable—according to the story books.

Britain's Debt to Canada

\$214,684,439 Due to This Country By The British Government

The Ottawa correspondent of the Toronto Globe says that, "Recently the Imperial government and Dominion government struck a balance of indebtedness to each other, apart from certain accounts still under consideration. The federal government's indebtedness to Great Britain, with the exceptions noted, was therefore wiped clean off the slate, leaving an amount of \$214,684,439 due to this country by the British government."

"During the war Great Britain paid the expenses of feeding and providing quarters to Canadian troops, who in Canada the Dominion government looked after paying for all munitions and a large part of the foodstuffs obtained on British account in this country. There have been previous adjustments. The last adjustment concerned an amount of \$251,976,738 owing by Canada to the British government, and a total amount of \$466,661,177 owing by the British government to the Dominion government."

THANKFUL MOTHERS

Once a mother has used Baby's Own Tablets for her little ones she gives such results that the mother has nothing but words of praise and thanks to utter. The best adjustment of the thousands of mothers throughout Canada who praise the tablets is Mrs. David A. Anderson, New Glasgow, N. S., who writes: "I have used Baby's Own Tablets for my children and experience has shown me that without them, I would urge every mother to keep a box of the Tablets in the house. The tablets are a mild but thorough laxative which soothe the bowels and sweeten the stomach, drive out constipation and indigestion, break up colds and simple fevers and make teething easy. They will act by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont."

The Anniversary Of the Automobile

First Practical Automobile Sold On This Continent Just Twenty-Two Years Ago

The automobile, as a utility, is so new, comparatively speaking, so essentially modern, still such a novelty in a way, that it is not easy to appreciate how indispensable it has already become. Attention has been called to the fact, somewhat startling at first to those who will remember when there were no automobiles in general use, that the first "horseless wagon," as it was then called, was sold commercially in the United States on April 1, 1894, enough in itself, perhaps, is now recognized as significant because it was the forerunner of steadily increasing transactions of a similar character which have been multiplied from year to year until more than a million and a quarter motor-driven vehicles were sold in the United States in the year just ended. Today it is claimed for the automobile and auto-truck manufacturing business that it stands first from the top in the list of American industries, employing more than three-quarters of a million persons in shops and factories.

The development of the motor-car, first in the form of the "horseless wagon," then as a truck, and then as a passenger carrier along lines similar to those followed today, was not a matter of chance, any more than the development of the airplane, the steam locomotive, or any other of the important modern devices now in general use. The results which are apparent today in the high-powered, efficient, and easily-controlled cars were achieved only by a basis of progressive development of a basic fundamental. As a matter of fact, it is claimed for the automobile that the self-propelled, trackless, motor-driven vehicle antedates the steam locomotive. It is pointed out by those who have traced the antecedents of the automobile of the present time, that in 1769, in France, Capt. Nicholas Joseph Cugnot constructed the first motor-propelled road vehicle which actually could be operated. It was wrecked on its trial trip, it is recorded, and is now preserved in the crude shapelessness, in the Conservatory of Arts and Trades in Paris. A few years later, to be exact, in 1787, it said that Oliver Evans built the first American automobile. This machine could not be successfully operated, and was abandoned. Then, in 1831, it appears, an Englishman, Walter Hancock constructed a steam motor car which made regular trips between London and Stratford, extending the route to Brighton. The machine was capable of transporting eleven passengers at a speed of nine miles an hour. It was not until some time later, probably about the year 1893, that the utilization of internal combustion hydro-carbon motors was found possible or practicable in self-propelling vehicles, and the automobile as it exists today may be traced back to that time. This type, originally known as the Panhard & Levasseur type, because of its having been developed by these French manufacturers, differed from the so-called horseless-carriage type because of the fact that its basis was a central frame to carry the power plant and serve as the keystone of the car structure. The idea, admittedly basic in automob-

ile manufacturing was not adopted in the United States until 1901 or 1902.

Industrial and social changes which have kept pace with the development of the automobile during the past 22 years are almost too numerous to permit of more than a general summing up, and even that would be superfluous. Particular important, from almost any point of view, is the effect which this development has upon national, state, and municipal highway improvement. In this respect the automobile may be said to have "paid its way." Under no other system of so-called direct taxation, perhaps, has it been found possible and practicable to assess the benefits more directly to those most benefited. The automobile owner has paid this tax willingly, and has had the pleasure, in most instances, probably, of seeing that his money was well and honestly devoted to the purpose for which it was intended. He has seen the western and eastern coasts of the United States, as well as the Great Lakes and the Gulf, brought closer together, practically speaking, and the playgrounds and the wooded parks placed within easy distance of the school, the home, the office and the workshop—Christian Science Monitor.

Minard's Liniment Cures Burns, Etc.

Food Shortage in Egypt

Food shortage in Egypt is being seriously felt in wheat provisions. Natives are unable to obtain wheat flour. Discontent is increasing in consequence. In relation to all imports of foodstuffs in Egypt, it is well to remember that for several years, owing to the fabulous value of cotton, Egyptians neglected the cultivation of foodstuffs.

De Style—Are they strong for prohibition in your town. Go back to the old days, a man is liable to be arrested for making a dry face.—Judge.

GIRLS DRAW A

MOIST CLOTH THROUGH HAIR

Let "Danderine" save your hair and double its beauty

Oh, girls, such an abundance of thick, heavy, invigorated hair; a perfect, wavy, silky hair, glossy, fluffy, bright and so easy to manage. That moisture a cloth with a little "Danderine" and carefully draw it through your hair, taking one small strand at a time; this magically removes all dirt, excess oil and grease, but your hair is not left brittle, dry, stringy or itchy, but amazingly soft with glossy golden gleams and tender lights. The youthful glints and curls of your hair. "Danderine" is a tonic-beautifier. Besides doubling the beauty of the hair at once, it checks dandruff and stops falling hair. Get delightful Danderine for a few cents at any drug or toilet counter and use it as a dressing and invigorator as told on the bottle.

Mill for Grinding Alfalfa

New Machine Will Turn Out The Actual Meal

One of the results of the huge alfalfa yield in the Lethbridge and Coalville areas of Southern Alberta during the past season and an indication of the confidence of the farmers there that this is merely a beginning of the yields of this fodder crop that will be produced, is made evident by the purchase by a local company of an alfalfa mill costing \$15,000.

This mill grinds the whole alfalfa plant into a meal, which, it is declared, has proven the most economical way to feed alfalfa. Alfalfa chop has been used in the past, but the new machine will turn out the actual meal. Its installation will mark the advent of a new important industry in the development of the district.

An Englishman and an Irishman were out one day and the former, wishing to have some fun with Pat, asked him if he was good at arithmetic.

"I am that," said Pat. "Then could you tell me how many shirts I could get out of a yard?" asked the Englishman.

"Well," said Pat, "that depends whose yard you get into."

Peddler—Can't I sell you a paper of pins today, lady? Lady.—No thanks, my husband bought a new shirt yesterday.—Judge.

No woman can reform a husband by continuous lecture process.

Big Road Contracts to Be Let

Eight Hundred Miles of Road to Be Built in Manitoba

Tenders for grading about 800 miles of roads will be called for in Manitoba within the next two months, according to information supplied by the province. This work will be let in contracts of from two to 75 miles. The work will be done under "The Good Roads Act," which has been in successful operation for the past six years. Up to the present, about 1,200 miles of work has been graded and about 400 miles gravelled under the act.

In addition to the road work, it is expected that over 100 concrete bridges will be constructed. The bridge work will include a steel bridge, 1650 feet long over the Red River; 1 concrete arch 100 feet clear span over the La Salle River; several bridges of concrete over the Assiniboine River; and a number of bridge from 30 to 50 feet clear span. Up to date, 384 bridges have been built under "The Good Roads Act," of which 271 were of concrete.

It is expected that over 4,000 miles of grading will be done in Manitoba within the next four years, and a large percentage of this mileage is to be gravelled.

Russia Needs Locomotives

Has Only 300 Now; Had 16,000 Before the War

Warsaw.—The report of Russian technical experts to the allied representatives at Warsaw on transportation conditions in Russia shows that there are approximately 300 serviceable locomotive throughout the country, as compared with 16,000 before the war. Russia at the present time is building 200 locomotives yearly, whereas before the war she built 800 to 1,000.

The Russian waterways are in an even worse state than the railway ways.

The Ladoga Canal, near Petrograd, the pre-war tonnage of which equaled that of the Suez Canal, are now absolutely barren of traffic. The estimated cost of restoring the railways is \$2,500,000,000 gold rubles; and waterways, 500,000,000.

The bigger the smoke the smaller the fire.

The Message of Home Preservation and Building Protection

Every surface within and without your home needs the protection which Paint and Varnish alone can give. Wear, decay, rust, stain from the surface. Protect the surface and you protect all.

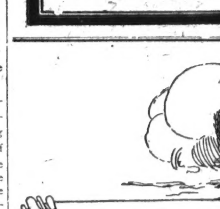

MARTIN-SENOUR PAINTS AND VARNISHES

are the most effective material protectors you can use for every surface—wood, iron, steel, stucco, cement.

When you choose a Martin-Senour product, you are sure of getting the paint or varnish best suited to your purpose. Because of its high quality and superior durability, it will prove the most economical for you to use.

Ask for copies of our two books—"Paints and Varnishes for the Home" and "Flooring—Spills and Stains." Free on request.

The MARTIN-SENOUR Co., Ltd., ST. BONIFACE, MANITOBA

The First Choice

THE reputation of the Silverplate of William Rogers and his Son for high craftsmanship and quality is widely spread throughout the Dominion. For more than three generations this famous ware has been known as "The Best at the Price."

The Silverplate of William Rogers and his Son "The Best at the Price" Wm. Rogers Mfg. Co. Ltd. High Grade Cutlery.

Further Outrages Are Reported From Ireland

London.—Further outrages in different parts of Ireland were reported today. A vacated police barracks at Blackrock, outside the Limerick boundary, was burned down. Four men were arrested under the Defence of the Realm Act and taken to Cork. At Nenagh, Tipperary, reports say three constables were shot at while riding bicycles from Reacross to Newport. It is said that one of the constables was killed, that another was fatally injured and the third badly wounded. A mail van from Cavan to Arva was held up near Crossodown and more than 100 pounds sterling, representing old age pension money, stolen. The Protestant cathedral at Ross Carbery, County Cork, was entered Wednesday night and the statue of the late Lord Carbery, valued at £1,000 was damaged beyond repair.

Appeal for Funds To Help League

God Help Our Children If League Is Allowed to Withier and Die
London.—Earl Grey, Premier Lloyd George, Admiral Beatty, former premier Asquith, Lord Robert Cecil, and John R. Clynes published an appeal in the London Times for 1,000,000 pounds sterling, to keep fresh in the minds of the people of this country the spirit and ideals which underlie the covenant of the League of Nations.

The appeal points out what the League of Nations union has already done in its education campaign. It says that a million pounds sterling sounds like a large sum but that if the British people do not support the League of Nations with all their might and resources, "the league itself will assuredly wither and die and if the league should die, God help our children, for no human agency can save them from calamities to which those of our race will appear as the merest trifle."

Strike Leaders Are Nominated
Winnipeg.—R. B. Russell, George Armstrong, W. A. Pritchard and J. J. Johns, four of the convicted strike leaders, were nominated for seats in the provincial legislature at a meeting of the Winnipeg branch of the Socialist party of Canada tonight. As Rev. William Ivens is on the tentative state of nominations made by the Dominion Labor party last week and Alderman Owen will, it is understood, be the nominee of the Social Democrat party, six of the seven strike leaders given jail terms, are likely to figure in what will undoubtedly be the most unique election in the history of Manitoba.

Postpone Cannery Inquiry

Ottawa.—The inquiry which the board of commerce will conduct into the alleged combine of canners in Canada is postponed indefinitely. The board feels that in view of the fact that the government has already gone into the activities of the canners in Canada, it is not justified in proceeding with its separate inquiry until a third commissioner has been appointed and the board is in a position to make a comprehensive review of the alleged combine.

France Consulted With Allies

Paris.—A note by Premier Millerand was read to the ambassadors today and then delivered to the German charge, Wilhelm von Inger, in which the premier declared that France had taken care to make in advance and consult with the allies before occupying the Rhine cities.

French Consul Commits Suicide
Paris.—M. Margot, French consul in London, committed suicide in a hotel here.

Trotsky Would Put Labor Under Military Discipline

Moscow.—Militarization is the only means to fully utilize Russia's man power, said Leon Trotsky, Bolshevik minister of war, addressing the ninth convention of the Communist party here. His address was directed to defining the relation between the mobilization of industry and the industrial rehabilitation of Russia. "Mobilization is more necessary now than it was formerly," he declared. "We have to deal with the present population and masses of unskilled labor which cannot be utilized to the fullest extent by any other means than military discipline. Trades unions are capable of organizing great masses of qualified workers, but 30 per cent. of the people cannot be reached by this means."

Germany Must Salute The French Flag

Despatch From Berlin Says French Commander in Rhineland Threatens Reprisals
Berlin.—Advice from the Rhineland report that the French commander-in-chief in the area occupied by his troops, has ordered all Germans to salute the French flag and French officers, and that he threatens reprisals in the event there are fresh outbreaks. The arrival of fresh forces throughout the day is reported. Railway communication between the occupied area and the rest of Germany is still suspended. Strasbourg despatches say new troops are steadily crossing the Rhine.

Says Sims Was Indiscreet

Rodman Criticizes Rear Admiral For Publishing Confidential Conversation

Washington.—Admiral Hugh Rodman, commander-in-chief of the Pacific Fleet, told the senate investigating committee today that Rear Admiral Sims' letter to Secretary Daniels criticizing the navy's part in the war, was "very indiscreet." "Admiral Sims' indiscretions," he said, "lay very particularly in his breach of confidence in making public an intimate and confidential conversation which should have been held secret." The witness referred to Sims' testimony that Admiral Benson, former chief of naval operations, told him prior to his departure for London, not to let the British pull the wool over their eyes; we would as soon fight them, as the Germans.

Will Not Withdraw Jap Troops
New York.—Japan will not withdraw her troops from Manchuria at once because of her peculiar geographical position and dangers which threaten her subjects in Manchuria and Korea, says a Tokio despatch filed March 31. The Japanese government, which quoted an official statement relative to the recall of Japanese officers from Russian territory, was delayed in transmission, and tends to explain the occupation of Vladivostok by Japanese soldiers on April 5.

Says Strike Broken

Chicago.—A break in the unauthorized strike of switchmen and engineers at Chicago, which started nine days ago with a subsequent spread to a number of railroad centers, announced here by A. A. Whitney, vice-president of the Brotherhood of Railroad Trainmen, who conferred with a committee of strikers from the Chicago and Northwestern railroad.

To Prolong Disarmament

Berlin.—The Berlin Tageblatt says it is informed that the German government is negotiating with the Entente for a prolongation to October 7 of the agreement of August, 1919, for the maintenance of troops in the neutral zone, pleading that a strong police force is required to maintain order in that area.

200 Barracks Were Destroyed

Dublin.—It is officially stated that the police quarters destroyed during the recent raids in Ireland numbered 220. From the claims already made for compensation it is estimated that the ratepayers will have to meet a bill exceeding \$2,000,000.

Indians Will Appeal To High Court

To Decide the Matter of the Rights And Status of Indians in Canada

Ottawa.—That the matter of deciding the rights and status of Indians in Canada will likely be taken to the highest court in the British Empire, was the statement made by A. C. Delisle, who described his standing as the mayor of Caughnawaga, and chief of the Caughnawaga Indians. Asked pointblank by the chairman of the committee deliberating on the proposed amendments to the Indian Act, Delisle said he did not know whether he was a subject of the present King of England, but he did know that he was entitled to protection from the British Crown by reason of treaties entered into between the British Crown and his forefathers as far back as 1744.

The sitting of the committee was taken up almost entirely with the hearing of chiefs from the various tribes. Mr. Delisle, who represents the Caughnawaga band, said they wanted to give any Indian the right to be a white man, but they did not want to make it in any way compulsory. "This Indian act has made Indians of more white men than it has made white men of Indians," he declared with vehemence. He also strongly objected to a man who changed his race being allowed to stay on the reserve. The man should be compelled to sell his land to the remaining members of the band.

"It simply means expropriation and the disintegration of the band, and as such is entirely unconstitutional. My opinion is that it should go to England to be decided by the highest courts there." Andrew Paul, a young Indian representing the Squamish nation of Indians of British Columbia, corroborated the claim of Delisle. His people, he said, had no copies of the proposed bill and did not want any. "They do not want to understand it, they do not want it anyway, whatever it is," he said, and then left the room. Other delegates urged that they should not be enfranchised because they did not pay any taxes.

Abandon Control of Newspaper

Announcement Follows Decision Of Supreme Court in Price Bros. Case

Ottawa.—The board of commerce announces that it will not henceforth claim to exercise any control whatever over newspaper print in Canada. The announcement follows the decision of the supreme court in the Price Bros. case, which held that a newspaper was not a "necessity of life" within the meaning of the expression in the Combines and Fair Prices act and that the powers exercised by the board of commerce as newspaper controller were without foundation. The board points out that the effect of the supreme court's decision is to render inoperative the orders-in-council constituting the board of commerce as controller of newspaper print in Canada. As a result, the board announces its intention of abandoning the control of newspaper, unless the board is subsequently invested, if that be legally possible, with competency-granted power.

The Hague.—The Newcoursant, describing the plundering of Essen by the Reds before the occupation of the city by government troops, says: "Part of the retreating Red troops gathered during the morning in Essen, captured all the German shops and delivered, plundered the shops and finally left the town in automobiles, firing at the inhabitants. The Red army commander ordered that the mines be blown up, but the mine guards, succeeding in repelling the Reds, although great damage was done to the mines."

Tried to Destroy Mines

Bolshevik Troops Plundered Stores And Fired at Inhabitants
The Hague.—The Newcoursant, describing the plundering of Essen by the Reds before the occupation of the city by government troops, says: "Part of the retreating Red troops gathered during the morning in Essen, captured all the German shops and delivered, plundered the shops and finally left the town in automobiles, firing at the inhabitants. The Red army commander ordered that the mines be blown up, but the mine guards, succeeding in repelling the Reds, although great damage was done to the mines."

And Fired at Inhabitants

Bolshevik Troops Plundered Stores And Fired at Inhabitants
The Hague.—The Newcoursant, describing the plundering of Essen by the Reds before the occupation of the city by government troops, says: "Part of the retreating Red troops gathered during the morning in Essen, captured all the German shops and delivered, plundered the shops and finally left the town in automobiles, firing at the inhabitants. The Red army commander ordered that the mines be blown up, but the mine guards, succeeding in repelling the Reds, although great damage was done to the mines."

Buried Shells Kill French Farmers

Cambrai.—Two explosions in which 12 persons were killed and 200 injured, occurred in the district of Villers Guislain, 18 kilometres from Cambrai. The explosions were caused by agricultural tractors coming in contact with unexploded shells in fields which were being ploughed.

Australia Delays Action

London.—The Daily Mail's Sydney correspondent says that the Commonwealth government is not taking action regarding a larger navy until after the Imperial conference. It adds that Canada's decision to not enlarge her navy has caused local anxiety regarding the care of the Pacific.

Albania Recognized

Rome.—Official recognition of the government and autonomous constitution of Albania has been extended by the Italian government according to the Epoca.

Many Labor Disputes

Last Year Proved to Be A Record In Strikes

Ottawa.—There were more strikes, labor disputes and general industrial turmoil with consequent time lost in Canada during 1919 than in any other year in the country's history. This is revealed in a report compiled by the labor department at Ottawa and just issued. Including eight carried over from 1918 there was a total of 298 strikes and lockouts in Canada during 1919. The number of employees involved was 138,988 and the number of employers 1,913. The total number of working days lost was 3,942,186. The previous record in working days lost was in 1911, when the record stood at 2,046,650 days lost. There were several outstanding strikes which contributed largely to the total time lost. Among these were the general sympathetic strikes in Winnipeg from May 15 to June 26, involving, according to labor department figures, 22,860 employees and a time loss of 924,562 working days; the strike of coal miners in district No. 10 from May 24 to the end of August, involving 6,250 employees and a time loss of 462,879 working days.

U.S. Short of Workmen

Thousands of Immigrants Are Going Back and Others Going to Canada

New York.—Canada's position as a rival to the United States in immigration is one of the matters to be considered at the first national American immigration conference which opened here. A statement submitted by the chairman, General Coleman Dupont, said: "America is 4,000,000 men short as a result of the dwindling of immigration since the war. Thousands of immigrants are going back; other thousands are migrating to Canada, Australia and South America. These countries are making organized efforts to attract immigration. The United States is not." The statement predicted the complete demoralization of industrial and credit conditions in the United States if the future supply of immigrant workmen is shut out. Other matters to be considered by the conference include nationalization, the shortage of labor, and the cause of unrest among foreign-born.

Loyalists Are Alarmed

Organized Campaign of Threats And Violence to Expropriate Lands in Ireland

London.—The Daily Graphic says that the situation in the south and west of Ireland has become so serious that the loyalists have not only decided to organize their own defence but are appealing to the English sympathizers to aid in the new movement. Irish republicans, says the Graphic, are beginning "an organized campaign of what is practically expropriation of land under the threats of violence and murder." Cattle Export May Be Stopped
Toronto.—There is danger that the export of Canadian cattle may be stopped if doubt is cast on the veterinary surgeons of this country, principal McGillivray of the Ontario Veterinary College, told the agricultural committee of the legislature recently. One shipment of cattle from the west has already been stopped at the United States border, the speaker said. The basis of the livestock industry rests on the veterinary profession, he declared, as all cattle must be properly inspected before exported.

All-Canadian Film Service

Legislation to Amend Moving Picture Act in British Columbia Planned
Victoria.—Legislation to amend the British Columbia Moving Picture Act, designed to authorize the creation of machinery for the taking of pictures in British Columbia of an educational nature and for their exhibition in the board, has been introduced in the Canadian government, Vancouver, provided such milling license declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board, basis in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store at public terminal elevator at Port Arthur or Port Arthur, for the quality and grade of wheat represented by such documents of title, together with an assessment paid to the board thereon, in accordance with the regulations of the board.

Act in British Columbia

Legislation to Amend Moving Picture Act in British Columbia Planned
Victoria.—Legislation to amend the British Columbia Moving Picture Act, designed to authorize the creation of machinery for the taking of pictures in British Columbia of an educational nature and for their exhibition in the board, has been introduced in the Canadian government, Vancouver, provided such milling license declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board, basis in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store at public terminal elevator at Port Arthur or Port Arthur, for the quality and grade of wheat represented by such documents of title, together with an assessment paid to the board thereon, in accordance with the regulations of the board.

Reichswehr Occupy Towns

Headquarters of the French Occupational Army, Mayence.—Tonight the German Reichswehr held the town of Duisburg, Mülheim, Essen, Dortmund and Iserlohn. It is reported also that they have occupied Hagen. Düsseldorf had not been entered by the Reichswehr this morning, as had been expected, but they were a few miles south of the city.

Germany Would Send Arms to Irish

Report of Uprising on Easter Is Said To Have Been Confirmed

London.—Recent unconfirmed reports of a Sinn Féin plot for an uprising in Ireland, were based on fact, according to the Irish police. They state that they are in possession of information, not only indicating that a rising was intended, but that certain Germans in Berlin had engaged to furnish war material. In this connection Thomas J. Loughlin, a Dublin business man and a member of the Sinn Féin, has been arrested under the Defence of the Realm act. No definite charge has as yet been deferred against him, but the Irish police state that his arrest was effected after they had learned that he was a party to a treaty with the Germans for arms and ammunition. With Loughlin's name, the police link that of Baron Lewis Von Horst, a former resident of the United States, who is now in Berlin, with whom it is alleged Loughlin was negotiating.

Newsprint Will Be Exhausted in 10 Years

Cleveland.—Newsprint on this continent is issued by a paper at the end of ten years unless there is conservation of pulp, declared Jason Ross, publisher of the New York Globe, at a meeting of the Cleveland Advertising Club today.

"The output of print paper is now dwindling rapidly," he said, "and the outlook at the pulp mills of Canada and United States will not be adequate to meet the demand, even if the supply of spruce timber holds out."

For Wheat Deliveries

New Regulations On Deliveries Of Wheat Promulgated By Board

Winnipeg.—The Canadian wheat board has issued a regulation (93) for the delivery of wheat by milling licensees, effective from this date inclusive, which orders: 1.—All wheat purchased by the milling licensees of the board shall, on receipt, be delivered to the board. 2.—Until July 31, 1920, the board will purchase, or provide a purchaser for all wheat grown in the provinces of Manitoba, Saskatchewan and Alberta, delivered by any milling licensees of the board. The Canadian government elevator at Calgary, Saskatchewan, or Moose Jaw, a public terminal elevator at Port Arthur or Port Arthur. 3.—Until June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling licensees of the board in store at the Canadian government elevator, Vancouver, provided such milling license declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board, basis in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store at public terminal elevator at Port Arthur or Port Arthur, for the quality and grade of wheat represented by such documents of title, together with an assessment paid to the board thereon, in accordance with the regulations of the board.

Divorce Court for Ontario

Bill Introduced in Senate Confers Jurisdiction to Province

Ottawa.—The bill introduced in the senate by Senator Ross, and given the blessing of the government, confers on the supreme court of Ontario, jurisdiction in regard to divorce. There is a similar bill in relation to Prince Edward Island. In consequence every province will now have divorce laws. The reform has been long talked of and is brought about by the appealing number who seek divorce, by the parliamentary method. There are 128 applications in this session. Of this number, 75 are from Toronto alone. The senate is not desisting itself of the right it possesses, but the enactment becomes law, its divorce activities will become very much reduced. As the main opposition to the reform has come from Quebec, and that province is left alone, the presumption is that the measure will pass with little difficulty.

Last Americans Leave Russia

Manilla, P.I.—Brig-Gen. W. M. Graves, commander-in-chief of American expeditionary forces in Siberia, with his staff of 32 officers and 300 men, have arrived here on the transport Great Northern, from Vladivostok. Shortly after the transport South Bend arrived with 1,600 troops and 119 war brides completing the evacuation of American troops from Siberia.

Action of France Taken Without Consent of Allies

London.—It is stated that the British government has sent a protest to the French government with regard to the occupation of the Ruhr region. After a long conference the French ambassador, Paul Cambon, had with Premier Lloyd George today and a full discussion of the Franco-German incident by the cabinet council, at which the French view was fully explained to the British ministers, an authoritative statement was issued to the effect that France acted entirely on her own initiative in deciding to occupy German towns; that Great Britain, the United States, Italy and Belgium were all opposed to the plan; and that France's action has caused a delicate situation. The matter is under discussion by the British and French governments and the hope is expressed that the situation may be eased.

Reichswehr Occupy Towns

Headquarters of the French Occupational Army, Mayence.—Tonight the German Reichswehr held the town of Duisburg, Mülheim, Essen, Dortmund and Iserlohn. It is reported also that they have occupied Hagen. Düsseldorf had not been entered by the Reichswehr this morning, as had been expected, but they were a few miles south of the city.

U.S. Declares State of War At An End

Newsprint Shortage Prevails in England

Canada Is The Only Hope In Assuring The Supply
London.—The shortage of newsprint paper was emphasized today in a luncheon given to Stanley Cousins, a noted paper maker, Lord Burnham, proprietor of the Daily Telegraph, who will head the Imperial Press conference visiting Canada, said it was difficult to see how the supply can be assured unless resources, particularly of Canada, were utilized with far greater potency than at present. Stanley Cousins said that the present quotations of pulp representing a 600 per cent. advance, was unjustified, but paper makers could not help it with the price of raw materials sky high. Lord Riddell, director of several newspapers, said: very few papers with large circulation now earned a profit. He feared they were going forward blindly, and would have a serious reckoning to face when present stocks were exhausted.

Bolsheviks on Polish Front

Washington.—Bolshevik forces on the Polish front are being regrouped and fresh forces brought up, the Polish war office today advised Major-General Byrnie, military attaché of the Polish legation here. "In the sector of Polesia, the Bolsheviks are on the defensive," the despatch said. "On the Volynian front they continued to attack us near Slawieschno."

Gold Shipments to U.S.

British Shipped Seventy-Eight Millions This Year
New York.—A shipment of approximately \$11,000,000 in gold, arrived here from England on the American line steamship Philadelphia, making the total gold consignments from Great Britain since the first of the year about \$78,000,000. With the despatch of this \$11,000,000 in gold tomorrow total consignments to countries on that continent during the same period will have totalled approximately \$157,000,000, including English shipments and gold drawn from local reserves.

Railroad Strike Spreading

Chicago.—An unauthorized strike of railroad employees, which started a week ago in the Chicago switching yards, by the discharge of a yard conductor, tonight had spread until it had effected 25 railroads and in Chicago had thrown more than 50,000 out of work, directly and indirectly. More than 10,000 union railroad men in Chicago and several hundred at Buffalo and Champaign, Illinois, were on strike. Many hundreds of men in Chicago packing houses were thrown out of work by lack of livestock.

Irish Outrages Enumerated

London.—One thousand and eighty-nine outrages were committed in Ireland between January, 1919, and March 29, 1920, according to an official white paper, which attributes them to the Sinn Féin movement. Thirty-one police, military and officials; and five civilians were killed; 81 were fired upon and 32 were assaulted. This total does not include the police barracks, to the number of more than 200, destroyed during Easter week.

France Consulted With Allies

Paris.—A note by Premier Millerand was read to the ambassadors today and then delivered to the German charge, Wilhelm von Inger, in which the premier declared that France had taken care to make in advance and consult with the allies before occupying the Rhine cities.

French Consul Commits Suicide

Paris.—M. Margot, French consul in London, committed suicide in a hotel here.

Trotsky Would Put Labor Under Military Discipline

Moscow.—Militarization is the only means to fully utilize Russia's man power, said Leon Trotsky, Bolshevik minister of war, addressing the ninth convention of the Communist party here. His address was directed to defining the relation between the mobilization of industry and the industrial rehabilitation of Russia. "Mobilization is more necessary now than it was formerly," he declared. "We have to deal with the present population and masses of unskilled labor which cannot be utilized to the fullest extent by any other means than military discipline. Trades unions are capable of organizing great masses of qualified workers, but 30 per cent. of the people cannot be reached by this means."

Tried to Destroy Mines

Bolshevik Troops Plundered Stores And Fired at Inhabitants
The Hague.—The Newcoursant, describing the plundering of Essen by the Reds before the occupation of the city by government troops, says: "Part of the retreating Red troops gathered during the morning in Essen, captured all the German shops and delivered, plundered the shops and finally left the town in automobiles, firing at the inhabitants. The Red army commander ordered that the mines be blown up, but the mine guards, succeeding in repelling the Reds, although great damage was done to the mines."

Buried Shells Kill French Farmers

Cambrai.—Two explosions in which 12 persons were killed and 200 injured, occurred in the district of Villers Guislain, 18 kilometres from Cambrai. The explosions were caused by agricultural tractors coming in contact with unexploded shells in fields which were being ploughed.

Australia Delays Action

London.—The Daily Mail's Sydney correspondent says that the Commonwealth government is not taking action regarding a larger navy until after the Imperial conference. It adds that Canada's decision to not enlarge her navy has caused local anxiety regarding the care of the Pacific.

Albania Recognized

Rome.—Official recognition of the government and autonomous constitution of Albania has been extended by the Italian government according to the Epoca.

Dress Up!
Spring's Here

THESE are the days that make a man feel good. It's in the air—you can't resist it. While you're feeling expansive, why not show it, brighten up. Start with a new spring suit, and go right through the list. The items and prices we have will prove interesting to every man and boy.

SMART NEW SOFT FELTS
\$5.00 \$6.00 \$6.50 \$9.00
All the smart shades that tally up with Spring suitings, and hat values you will appreciate.

IN NEGLIGEE AND DRESS STYLES
FOORE SOFT COLLARS

HOLE PROOF HOSE
For Men and Women
The new Spring shades in many colors. First quality hose—will give good wear.

New Rain Coats
For Men and Women
In Fancy Tweeds and Paramattas
Plain and belted styles with Raglan or set in styles
For Women \$10.00 to \$32.50
For Men \$12.75 to \$29.00

SPRING SUITS
Fine Business Suit
This fine range of suits is really marvelous value. Made from high grade wools and tweeds of service giving materials. They are well tailored and good fitting the best of linings and trimmings being used. They come in brown and grey, neat checks and brown mixtures. Out in the two and 3 button Standard models.
Price \$18.00 to \$35.00

For Young Men
We show a specially smart line of Ultra fashionable suits in the famous **SOCIETY BRAND**. All hand tailored of the better class of all wool tweeds. An inspection of our new styles will convince you that this is the correct store in which to buy your new spring suits.

Society Brand Clothes

CHIROPRACTORS
Cannot Be Examined By The University of Alberta Because They Do Not Know Chiropractic
By E. Duval, D. C., President Canadian Chiropractic College, Hamilton Ontario
It is absolutely preposterous for the Prime Minister and the Hon. Mr. Mackay to try and make the people believe that the University of Alberta can examine Chiropractors, because it has neither the talent (faculty) nor the knowledge necessary. There is no medical institution in Canada equipped to teach, or examine in that science, including the Toronto University. The writer has \$10000.00 to back up this assertion.
There can be no question whatever, that of two elements in contest, the fittest will survive.
Now what is the fittest?
Of two of the contending forces, which is the fittest? Thinkers have no hesitation in saying that it is Fact, Truth, Natural Law.
Nothing inconsistent with these can survive.
To elucidate:
From time immemorial, we have had Doctors of medicine who proclaimed in their day, that they knew the cause of disease, and the remedy and the cure. Everyone of them, and their ideas, have perished and the most notable ones are nothing more than a memory. The others have been cast in the garbage-can of oblivion. Why? Because they were not facts, Truth, or Natural.
Neither is the present so-called "Scientific Medicine" true, because it is founded on the same old error of the past, on the baseless supposition that when one is sick he lacks some amenable concoction or other to be rubbed in, administered by way of the mouth or rectum, or squirted with a syringe into the circulation. The whole of which is as false as the "floor" of the Bottomless Pit.
Natural Law, (the fittest) does not work this way in man. When one is sick, the Nature within him can diagnose the trouble much better than any unrelated genius (?), and can administer the correct dose of the right medicine that it can prepare out of the material that is always available in the air, food and water, that the patient has the appetite for, because man is endowed with the most efficient chemical laboratory known to man. To attempt to supplement that from the outside is nothing short of blasphemy.
Chiropractic does nothing else than adjust man's mechanisms so that the inward Physician can get in commun-

ication with the diseased part. Hence Chiropractic is bound to survive all previous and present methods, as health, as it is based on nothing else than the principle of Natural Law. It is in the world today, and is bound to stay—Alberta included, Hon. Mr. Mackay notwithstanding.
Generally, when we speak of "Law" we rarely realize that this term is exceedingly ambiguous and that it has a double meaning. There is only One Law and that is Natural Law. Laws (?) made by the Governments of the world, are not Laws. Law is immutable, it cannot be changed, neither can it end, because it had no beginning. Legislative enactments are not laws, they are merely ordinances that are as fickle as a weather-cock, especially when they are not supported by public approval. They are made and altered, amended and repealed to suit the exigencies of the interests that can influence the Legislatures, which, in the present instance, are the Manikins for the "Punch and Judy" stage of the "American Medical Association" as it is the American Association that make the bullets for the Punch and Judy (Legislatures) to shoot at the people of Alberta.
We of the East have often heard a repeated slogan of the West, viz., "The people of the West are ever ready to give any promising thing the 'Once Over,' and we know that Chiropractic is certainly entitled to that consideration; but the Government is trying to place itself on record that this is not true, which is a pity.
The Premier and the Hon. Mr. Mackay are making a miserable attempt to make the Legislature and the people generally believe, that they will be enabled to have access to a genuine Chiropractor if their proposed Bill passes the House and becomes law. It is a laugh.
Surely these two Gentlemen must know that any enactment must have the sanction, approval, and support of the people to survive, or else it will be honored more in the breach than in the observance. Therefore their proposed compromise of having Chiropractors examined in the Universities by medicals who know nothing about it, is bound to be repealed as soon as a New and more Democratic party comes in Power.
The present subterfuge enactment of the Government is doubtless made at the instigation of the political doctors to camouflage their real design which is to clear the Chiropractors out of the province so to give them a clear field of exploitation by eliminating the competent Chiropractic competitor.
Let us consider the anomalous position in which the Government is placed by according to the urgings of the medicals.

The Medical profession, the Continent over, is on record as having said Chiropractic is a fraud, a fake, a quackery and a public evil. The Government must necessarily believe that it is, or it is not a fake. Evidently, it is not a fake since it proposes giving it to the people; but the incongruity of the whole thing is that the Government proposes to have it brought under those who say it is quackery and a fake.
Is this not a thing to make the people believe that the Government will lead them to heaven by way of hell? What kind of, and how many Chiropractors will the people of Alberta have when they are examined by those who declare that Chiropractic is an imposture.
Should the Hon. gentlemen answer that an able Chiropractor will be engaged to examine the fakes (?) in the University (we doubt very much if one could be found who would prostitute himself to do this) then we would ask the Hon. Gentlemen to explain how a Chiropractor who they say is not educationally qualified to practice his profession is qualified to qualify others to practice? Any attempt at an answer would be a stultification of common sense.
The writer of this article is on record before the Ontario Government that Chiropractic and Medicine cannot work in the same harness, as they are absolutely antipodal and antagonistic to each other. Chiropractic is purely natural and based on an indisputable Scientific fact; while medicine is unnatural and based on a never ending change from error too more error. To tack Chiropractic as a tail to the medical dog is impossible, as the dog could not wag the Chiropractic tail; to the contrary, the tail would not only wag the dog, but would kill him altogether. In the government of Alberta, it is not aware that in Ontario, it is considered cruel and a punishable offence to tie such a can to such a dog's tail, even if he is a mongrel!
If the Government believes that such a compromise will settle the Chiropractic issue, it is greatly mistaken, and will soon find out that this compromise has compromised the Government much more than it has settled the question.
Compromises never settle questions of this nature, as compromises preclude settlement; they are only miserable make-shifts to evade the responsibility that Legislators owe to their constituents, and they should not forget that there will be a day of reckoning (election day) before they enter into a compromise of public rights.
Enactments and statutes notwithstanding, Chiropractic is in Alberta to stay, because Chiropractic is the survival of the fittest among the healing

arts; and if the present government crushes it, temporarily because it is young, it will, like the Phoenix, rise from its ashes to minister to the sick of Alberta, as it does in the more civilized parts of the world. The present government is certainly not a good example of what is called the "Progressive West." Saskatchewan has taken the lead by recognizing Chiropractic; Ontario, the banner Province of Canada, and the "Seat of Culture" in the Dominion has realized that Chiropractic is at least one of the leading factors in health, and steadfastly refuses to comply with the requests of the decayed Medical oligarchy, as evidenced by the Governments refusal to accept Justice Hodgins' report, that frankly favored the Medical Trust.
Alberta alone proposes to be a Back Number. The people alone govern. Legislatures are their servants, therefore it behooves the people to see that their will is carried to fruition.

The Other Side of Chiropractic
Editor Rimbey Pioneer.
I do not as a rule indulge in letter writing for publication, but today I am going to break into print. The occasion is an article signed by a Chiropractic Doctor in which he raves beyond reason. The letter referred to is nauseating, emanating as it evidently does from an ignorant and biased man. Every paragraph in the letter reeks with ignorance, with here and there a touch of Bolshevikism. The writer takes a hard slam at the medical profession, and attempts to tell us that the Chiropractor knows it all, and that the medical men are worse than useless. It is not worth while taking up the cudgels for the medical profession, no one but a fool would make the charges that the Chiropractor doctor makes in his letter, but some people may be misled by his letter. What does the Chiropractor know that the medical doctor does not? A medical doctor has to pass a stringent examination in anatomy, and he knows every nerve, and the source of every nerve in the human body. Knowing that would a medical man not be a foolish person to take other means of curing a patient, when by a poke in the back he could get right at the source of the trouble? This one fact should show those who believe in Chiropractors the idiocy of their claims. Another thing—medical men are educated men. They cannot get their diplomas by a correspondence—school rule. It takes a good education to start with, and then many years in

the university before a medical man can practice. What can an uneducated man learn of the curing of human ills in a six months course in an unrecognized school run by an uneducated bunch of people calling themselves doctors of chiropractic? I personally know persons, literally to an alarming degree, who have within a year gone down to a place where they make chiropractors, and they are now out working at their profession, and mauling the human body. It is a shame and a disgrace that any country or state allows people of this kind to gull the public, and I am greatly pleased to see that Alberta is going to see that capable practitioners only will be allowed to operate in the province. The government is giving the Chiropractors a chance to show that they are competent to diagnose a case of illness and when they pass the examination that every other profession has to pass, they are at liberty to practice to their hearts content. It strikes me as very strange that any sane persons would prefer to trust their lives to the hands of an unqualified party, when qualified practitioners are available. All they have to do before showing their foolishness, is to remember that the medical doctor knows all about the nerves, the spine and every other function of the body, that if a piece of that spine was out of place he would know it, and furthermore, would know what steps to take to put it right. Personally I know nothing about medicine, but if I ever need medical care I will hang up a qualified man, and not take the chance of being tripped for life by allowing some ignorant boob to disarrange my anatomy.
I think it is the Chiropractor that needs adjusting, and would suggest that a number eight boot on the foot of a perfectly healthy man, applied at or near the end of the spinal column, would work wonders among that fraternity, as it might jar the nerve center that supplies the "gull".
Thanking you for the space,
Yours truly,
GEO. ANDREWS,
Gibby, Alberta.
A young lady would be glad of plain sewing and mending. Apply at this office.
M24-3p.
